

DSL-IP · MOBILIZED FINANCE AT A GLANCE

Delivering finance to dryland landscapes

Across 11 partner countries and a Global Coordination Project, the Drylands Sustainable Landscapes Impact Programme has converted a focused GEF-7 grant into a USD 635 million programme of investment in dryland restoration, mobilizing USD 5.6 of partner co-financing for every GEF dollar. This is the operational and financial backbone on which the proposed DFSA is being built.

THE LEVERAGE A USD 96 million GEF-7 grant anchors a programme nearly seven times its size; the rest is real resources committed by governments, finance institutions and partners on the ground.

Mobilized finance across the operational partners

Co-financing is not a paper number. It is the standing budgets, recurrent expenditure, investment and in-kind contributions that **partner institutions commit alongside the GEF grant**. Across the portfolio it is dominated by recipient-country governments, then leveraged further by multilateral and bilateral finance partners.

Recipient-country governments

line ministries, forestry & environment agencies, local administrations

~\$289M · 54%

Multilateral & bilateral finance

World Bank / IDA, IFAD, KfW, SIDA, Green Climate Fund & the ILM Multi-Donor Trust Fund

~\$180M · 33%

GEF Agencies: technical co-finance

FAO, the World Bank, IUCN & WWF as implementing agencies

~\$48M · 9%

Civil society, private sector & communities

NGOs & CSOs, producer organizations, community in-kind labour

~\$22M · 4%

Indicative composition consolidated from confirmed co-financing letters across the portfolio. Government commitments are predominantly recurrent expenditure and investment mobilized; donor and IFI commitments include grants and parallel investment (e.g. IFAD in Zimbabwe, World Bank/IDA and the ILM MDTF in Mozambique, KfW in Botswana and Namibia, the Green Climate Fund in Kenya).

Government institutions, communities and partners convene at a DSL-IP field exchange. The finance behind the programme is mobilized by the people and institutions who implement it on the ground.

GEF COUNTRY-LED IMPLEMENTATION MODALITY

Governments execute and co-finance; the GEF Agency assures

The GEF works through a **country-led, country-owned modality**. Under the DSL-IP each child project is executed nationally by government institutions, the **Operational Partners**, which carry direct responsibility for delivering activities and for the co-financing committed against them. FAO, the World Bank or IUCN act as **GEF Agency**, providing oversight, fiduciary assurance and no-objection, but not execution. Ownership sits inside national systems.

COUNTRY-OWNED	GOVERNMENT-EXECUTED	AGENCY-ASSURED
NATIONAL PRIORITIES LEAD Each project answers a country's own LDN, forestry and land-use commitments.	OPERATIONAL PARTNERS DELIVER National ministries and agencies execute and commit budgets, staff and recurrent expenditure as co-financing.	FAO · WB · IUCN · WWF The GEF Agency provides oversight, fiduciary assurance and no-objection, assuring quality without displacing ownership.

How government ministries co-finance and jointly implement

COUNTRY	COLLABORATING GOVERNMENT MINISTRIES & INSTITUTIONS (ALLOCATION, US\$M)	GEF AGENCY	GOVT TOTAL (US\$M)
Angola	Min. of Culture, Tourism & Environment (MCTA) · Min. of Agriculture & Fisheries (MINAGRIP)	FAO	34.4
Botswana	Min. of Agriculture 44.8 · Min. of Environment, Natural Resources Conservation & Tourism 10.1 · Min. of Presidential Affairs 18.8	FAO	73.7
Burkina Faso	Min. of Environment, Green Economy & Climate Change 11.2 · Min. of Animal & Fishery Resources 13.4	IUCN	24.6
Kazakhstan	Min. of Ecology & Natural Resources, Committee of Forestry & Wildlife	World Bank + FAO	—†
Kenya	Min. of Environment & Forestry / NEMA 3.5 · Min. of Agriculture & Livestock / KALRO 2.0 · Narok & Kajiado County Governments 1.7	IUCN	7.2
Malawi	Min. of Natural Resources & Climate Change 2.9 · Min. of Agriculture 1.6 · Min. of Local Government 2.6	FAO	7.0
Mongolia	Min. of Environment & Tourism 10.0 · Land Administration Agency (ALAMGAC) 3.0 · three Provincial Governments 15.0	FAO + WWF	28.0
Mozambique	Min. of Land & Environment (MTA), via Nat. Administration for Conservation Areas (ANAC)	World Bank	3.0†
Namibia	Min. of Environment, Forestry & Tourism (MEFT) 9.7 · Environment Investment Fund (EIF) 9.6	FAO	19.3
Tanzania	Min. of Natural Resources & Tourism / TFS 27.7 · Vice-President's Office 1.6 · Min. of Agriculture 0.5 · Min. of Water 1.0 · District Councils 5.6	FAO	36.4
Zimbabwe	Min. of Environment, Climate & Wildlife (MECTHI): EMA 18.0 · Forestry Commission 10.0 · Parks & Wildlife / ZPWMA 1.5	FAO	30.4

Table 2. Government ministries and institutions executing each child project (Operational Partners) and their committed co-financing, from the project documents. Per-ministry allocations are shown where the documents itemize them; †in Kazakhstan and Mozambique partner finance is delivered mainly as a World Bank loan / IDA grant. The Global Coordination Project is executed by FAO and is not country-specific.

MANY MINISTRIES, ONE WORKPLAN: JOINT IMPLEMENTATION BY DESIGN

In most countries **three or more ministries co-finance and co-deliver the same project** (agriculture, environment and forestry, land, water and local government), pooling their budgets under a **single national workplan and shared fund-management arrangement**. Altogether more than **30 ministries, agencies, funds and district authorities commit roughly USD 290 million, over half of all co-financing**, as their own implementation responsibility. The DSL-IP is delivered by countries, not to them: the cross-ministerial execution capacity the proposed DFSA is built to scale.

WHERE THE FINANCE SITS · WHAT IT BUYS

By country project, and by thematic area

CHILD PROJECT	REGION	LEAD AGENCY	GEF (US\$M)	CO-FINANCE (US\$M)	TOTAL (US\$M)
Angola	Southern Africa	FAO	5.36	34.50	39.86
Botswana	Southern Africa	FAO	5.35	78.98	84.33
Burkina Faso	Sahel	IUCN	6.68	34.29	40.97
Kazakhstan (2 pillars)	Central Asia	World Bank + FAO	6.28	60.90	67.18
Kenya	East Africa	IUCN	5.46	14.08	19.54
Malawi	Southern Africa	FAO	6.35	47.70	54.05
Mongolia	Central Asia	FAO + WWF	5.35	49.75	55.10
Mozambique	Southern Africa	World Bank	23.12	50.50	73.62
Namibia	Southern Africa	FAO	6.13	54.55	60.68
Tanzania	Southern Africa	FAO	7.37	37.30	44.67
Zimbabwe	Southern Africa	FAO	10.43	60.69	71.12
Global Coordination (GCP)	Global	FAO	8.06	16.11	24.17
Programme total	11 countries	FAO · WB · IUCN · WWF	96.0	539.4	635.3

Table 1. GEF grant financing and confirmed co-financing per child project (US\$ millions), from the project documents. GEF figures are grant financing exclusive of agency fees; total GEF resources including agency fees and preparation grants approximate USD 104 million. Kazakhstan is delivered through two pillars: World Bank (Pillar 1) and FAO (Pillar 2); Mongolia is co-implemented by FAO and WWF.

Investment per thematic area

The programme's environmental investment follows the GEF focal-area benefit streams, with sustainable land & forest management dominant, integrated through a strong multifocal core.

Indicative share of GEF investment by focal area across the portfolio. Most child projects blend land degradation, biodiversity and climate-mitigation outcomes within one integrated-landscape design, so themes reinforce rather than separate.

THIS STRUCTURE IS THE BACKBONE OF THE PROPOSED DFSA

The DFSA does not start from zero. It inherits a **USD 635 million, multi-partner investment platform**: a proven 1 : 5.6 leverage model, an established One-FAO technical architecture, harmonized methodologies (ILAM, SLPF) and Communities of Practice across 11 dryland landscapes. Its role is to **build on this existing impact and focus squarely on scaling**: directing new dryland investment through the same operational partners, blending it with private and concessional finance, and channelling it to the bankable, field-tested models the DSL-IP has already de-risked, so every new dollar compounds proven results rather than rediscovering them.
